PROFESSIONAL SUMMARY

AI Delivery & MLOps Consultant with 3+ years of enterprise engineering experience at Bell Canada and advanced graduate training in Artificial Intelligence. Experienced in deploying, validating, and optimizing AI systems across regulated environments, including REST-based AI services, validation pipelines, and agentic workflows. Proven ability to translate AI architecture into production-ready solutions that drive measurable business value. Microsoft Certified (AI-900) with demonstrated success delivering client-facing AI implementations and executive-level decision systems..

EDUCATION

MAY 2025 - PRESENT
MASTER OF MANAGEMENT IN ARTIFICIAL INTELLIGENCE, SCHULICH SCHOOL OF BUSINESS — YORK UNIVERSITY

SEP 2015 - DEC 2020
HONOURS BACHELOR OF ENGINEERING, ELECTRICAL, CARLETON UNIVERSITY

SKILLS

AI & MLOps Deployment - AI lifecycle management • Model validation & monitoring • Production evaluation • Prompt optimization • Agentic workflows • REST API integration
Cloud & Data Engineering - Multi-cloud architecture awareness (AWS) • Data Lake integration • ETL/ELT pipelines
Programming & Analytics - Python • SQL • Model Evaluation • Precision–Recall Optimization • Tableau
AI & Governance - ML Lifecycle • Data Validation • Responsible AI • Explainability (XAI)
Consulting & Delivery - CI/CD Concepts • Data Governance • Stakeholder Engagement • Agile/Scrum

EXPERIENCE

SEP 2025 – PRESENT
AI CONSULTANT, TRUEIMPACT CANADA

- Architected modular, cloud-ready AI scoring services with structured REST-style APIs and bounded adjustment layers, enabling scalable integration into enterprise analytics ecosystems
- Designed and implemented validation pipelines across 200+ benchmark datasets, improving model alignment and reducing bias through tolerance-based monitoring
- Engineered reusable ETL-style processing workflows in Python, accelerating insight generation cycles by 40% while maintaining strict data governance thresholds
- Partnered with cross-functional stakeholders to translate predictive AI outputs into executive-ready decision frameworks (What → So What → Now What)

JUN 2025 – PRESENT
COHORT REPRESENTATIVE, MMAI PROGRAM, GENERAL BUSINESS COUNCIL - SCHULICH SCHOOL OF BUSINESS

- Elected representative for a cohort of 80+ students, acting as liaison between students and faculty leadership
- Consolidated dozens of student inputs per term into summaries used in governance and policy discussions

JAN 2022 – FEB 2025
SOFTWARE DEVELOPER (FULL STACK), BELL CANADA

- Designed and deployed enterprise-scale data and reporting systems integrating structured and semi-structured datasets across 5+ platforms
- Built and optimized SQL-based data pipelines supporting KPI monitoring, compliance analytics, and executive oversight
- Led data stewardship initiatives ensuring audit-ready integrity, accessibility compliance (WCAG 2.1), and cross-platform reliability
- Recognized with the Excellence & Innovation Award for delivering measurable operational efficiency improvements

NOV 2021 – DEC 2021
QUALITY ASSURANCE INTERN, GET A-HEAD

- Tested multiple system features and workflows per release for usability, security, and compliance with organizational standards

MAY 2016 – AUG 2016
ASSISTANT, VFS GLOBAL (DUBAI)

- Digitized hundreds of records, reducing manual errors and improving retrieval efficiency

ACHIEVEMENTS & APPLIED PROJECTS

TELUS FLOURISH, AI AT THE EDGE OF INNOVATION HACKATHON | 1ST PLACE (CANADA-WIDE)

- Architected an AI-driven decision intelligence and precision agriculture platform aligned with TELUS Agriculture & Consumer Goods sustainability goals, enabling proactive risk anticipation and yield optimization
- Designed an end-to-end system translating predictive analytics across environmental, soil, and crop data into actionable farmer insights, reducing chemical usage and input costs
- Delivered a deployable product vision supported by a clear business case, responsible AI framing, and real-world scalability within a 24-hour build window

WOMEN IN AI HACKATHON | 1ST PLACE (CANADA-WIDE)

- Led end-to-end problem framing and user-centered design to build *MindBloom*, a neurodiversity-inclusive AI learning and wellbeing application
- Developed rigorous evaluation metrics and a compelling business narrative to demonstrate technical viability, ethical considerations, and market fit to industry judges

SCHULICH DEAN'S CUP | ROUND 1 TOP 5 (ACCENTURE), ROUND 2 WINNERS (RBC)

- Delivered a data-driven business recommendation using strategic frameworks to translate customer insights into executive-level solutions for a financial services context
- Presented findings to faculty and industry judges, demonstrating high-stakes communication, structured thinking, and insight synthesis

GOOGLE CLOUD × AI TINKERERS HACKATHON | GOOGLE TORONTO

- Built *Orbi AI*, a personal AI assistant designed to address social isolation, leveraging Vertex AI Agent Builder with grounding and multi-turn conversational reasoning
- Focused on human-centered GenAI design, trust, and usability in real-world applications

PRIVACY & RISK ANALYTICS REPORTING PROJECT | SCHULICH SCHOOL OF BUSINESS

- Designed executive-style dashboards to analyze risk themes and trends across datasets, emphasizing data validation, KPI definition, and threshold-based interpretation
- Translated analytical findings into clear, governance-ready insights to support oversight and compliance-style decision making

AGENTIC AI & GENERATIVE AI SYSTEMS PROJECT| SCHULICH SCHOOL OF BUSINESS

- Engineered an agent-based AI system integrating tool calls and multi-turn reasoning within a production-oriented workflow. Prioritized transparency and safe system behavior to ensure reliability and responsible deployment

CERTIFICATIONS & PROFESSIONAL RECOGNITION

- Microsoft Certified: Azure AI Fundamentals AI-900 (2025)
- Explainable Artificial Intelligence (XAI) Concepts — DataCamp (2025)
- Business Problem Framing — INFORMS (2025)
- Mentor — AI Women Lounge (2025)
- Hackathon Judge, BrainStation (2024)
- Guest Speaker, Women in STEM – University of Ottawa (2024)
- Society of Women Engineers
- Keynote Speaker, Montreal Bell Summit (2024)
- Excellence & Innovation Award, Bell Canada (2022)
- Bell Ambassador, Bell Canada (2023)
